COACHING SPECIALTIES

- Financial services sector
- Lending Fintech segment

COACHING PASSION

Passionate about numbers and connecting the dots in business. I have a deep interest in people's success and the growth of FinTech entrepreneurs, board members and executives. Success for me is when executives and leaders know how to navigate the numbers and the financial side of the business so that it grows in value and tackles those big goals (like scaling the business) without risking the business, speed or innovation.

WORK EXPERIENCE

Successful thirty-year career in the financial services industry, more recently working as a credit and risk consultant. Held executive positions for fifteen years within risk management. I had a personal mandate of USD100m and worked through more than 800 new deals/businesses from various sectors and of varied complexity, covering corporates, banks, Non Bank Financial Institutions, SME's and other large businesses.

COACHING EXPERIENCE

Qualified business coach with local and international business and leadership experience where mentoring and coaching were part of the job. I have many hours of practical business coaching.
