COACHING PASSION

My passion is to help you as a business owner excel at your business(es). If you are already a successful business owner or entrepreneur, I would like to coach you to become better. Good teams and phenomenal leaders continue to be coached. It is what make them unbeatable. When helping entrepreneurs, business owners and aspiring business owners, I feel alive and in flow. When we work together your goals, objectives and outcomes will seem clearer and more achievable.

WORK EXPERIENCE

My business acumen, knowledge and experience began when I was 8 while working the cash register in my family’s business. Later I was given my own business within the family business where my father mentored into making my own money. My experience, competence and ability in the retail industry grew during my teenage years and has since benefited many individuals. I obtained my LLB Law Degree in 2008 and I began my articles in 2009. I was admitted as an Attorney in the High Court in 2009. Shortly thereafter I began my second business, my own legal practice. During this time, I developed a real passion for business and for leading in my law firm. I preferred leading and managing to practicing law and so I embarked on a new business venture a Social Media Marketing and Management business. My business helped small business owners master their social media challenges and it was this event that motivated me to further my passion for business. 2021 my knowledge and abilities were put to the test when I qualified as a QUALIFIED SA Business Coach.

COACHING SPECIALTIES

- Retail Development
- Building Professional Practices
- New Attorney Coaching

COACHING EXPERIENCE

I have coached individuals before qualifying as a QUALIFIED SA Business Coach. My SA Business Coach Training escalated my real coaching experience because of the individuals, business owners and COO’s I coached along the way. The best part of coaching people in business is helping them and the business achieve their goals, objectives, and outcomes. I like seeing individuals in business grow and I like being there for them to see the look of joy on their faces when they succeed. Following a tried and tested framework and methodology has shown to be extremely effective. It makes my job as a coach easier because it creates amazing results for clients. Each coaching plan we co-create brings new challenges for both my client and myself to solve. Together we achieve more.
